Matching and Weighting

Polimetrix interviewed 949 respondents who were then matched down to
a sample of 800 to produce the final dataset. The respondents were matched on
gender, age, race, education, party identification, ideology and political
interest. Polimetrix then weighted the matched set of survey respondents
to known marginals for the registered voters of Texas from the 2008 Current
Population survey and the 2007 Pew Religious Life Survey.
