June 2024 Texas Statewide Survey Crosstabs

Table of Contents

Methodology.....	7
Interest and Engagement.....	8
Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?.....	8
Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?.....	10
Q3A. How enthusiastic would you say you are about voting in the 2024 election?.....	12
Most Important Problem.....	14
Q4. What would you say is the most important problem facing this country today?.....	14
Q5. What would you say is the most important problem facing the State of Texas today?.....	15
Retrospective Assessments.....	16
Q6. How would you rate the job Joe Biden is doing as president? Would you say that you.....	16
Q7. How would you rate the job the U.S. Congress is doing? Would you say that you.....	18
Q7A. How would you rate the job the U.S. Supreme Court is doing? Would you say that you.....	20
Q8A. How would you rate the job Greg Abbott is doing as Governor? Would you say that you.....	22
Q8B. How would you rate the job Dan Patrick is doing as Lieutenant Governor? Would you say that you.....	24
Q8C. How would you rate the job Dade Phelan is doing as Speaker of the Texas House of Representatives? Would you say that you.....	26
Q8D. How would you rate the job Ken Paxton is doing as Attorney General? Would you say that you.....	28
Q9A. How would you rate the job Ted Cruz is doing as U.S. Senator? Would you say that you.....	30
Q9B. How would you rate the job John Cornyn is doing as U.S. Senator? Would you say that you.....	32
Q10. Thinking about the country, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?.....	34
Q11. Compared to a year ago, would you say that the national economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	36
Q12. Thinking about the State of Texas, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?.....	38
Q13. Compared to a year ago, would you say that you and your family are economically a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	40
Q14. Compared to a year ago, would you say that the Texas economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	42
Q15. A year from now, do you expect that the national economy will be a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	44
Q16A. Please tell us whether you have a very favorable, somewhat favorable, neither favorable nor unfavorable, somewhat favorable, or very unfavorable opinion of: The federal government.....	46

June 2024 Texas Statewide Survey Crosstabs

Q35I. In your opinion, in the United States today, how much discrimination is there against...
 Christians.....227

Q35J. In your opinion, in the United States today, how much discrimination is there against...
 Muslims.....229

Q35K. In your opinion, in the United States today, how much discrimination is there against...Jews
231

Q36. In your opinion, which of the following groups faces the MOST discrimination in the United
 States today?.....233

Q37. Do you think that women who want to avoid becoming pregnant should have access to birth
 control?.....236

Q38A. Would you support or oppose Texas enacting policies designed to...Prevent women from
 accessing abortion in states where abortion is still legal.....238

Q38B. Would you support or oppose Texas enacting policies designed to...Prevent women from
 obtaining medicated abortion pills.....240

Q38C. Would you support or oppose Texas enacting policies designed to...Penalize companies that
 pay for abortion related travel expenses for employees living in Texas.....242

Q38D. Would you support or oppose Texas enacting policies designed to...Prevent women from
 using in-vitro fertilization (IVF) procedures to get pregnant.....244

Q39A. How often do you think that people who are eligible to vote in Texas elections are prevented
 from voting?.....246

Q39B. How often do you think that people who are not eligible vote in Texas elections?.....248

Q40A. How likely do you think it is that each the following will happen this summer: You will be
 asked to conserve power.....250

Q40B. How likely do you think it is that each the following will happen this summer: You will
 experience rolling, or temporary blackouts.....252

Q40C. How likely do you think it is that each the following will happen this summer: There will be
 a widespread failure of the electric grid.....254

Q41. Do you think that Texas spends too much, too little, or about the right amount on border
 security?.....256

Q42. Thinking about legal immigration, do you think the United States allows too many people to
 immigrate here from other countries, too few, or about the right amount?.....258

Q43. Do you agree or disagree with the following statement: Undocumented immigrants currently
 living in the United States should be deported immediately.....260

Q44. Regardless of whom you supported, do you think Joe Biden legitimately won the 2020
 presidential election?.....262

Methodology

Sampling and Weighting Methodology for the June 2024 Texas Statewide Study

For the survey, YouGov interviewed 1,302 Texas registered voters between May 31st – June 9th, 2024 who were then matched down to a sample of 1,200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education.¹ The frame was constructed by using different subsets of a politically representative "modelled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2020 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. The weights were then post-stratified on 2020 Presidential vote choice, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

The margin of error for the full sample of registered voters is +/- 2.83% (3.16% for the weighted data).

Survey Panel Data

The YouGov panel, a proprietary opt-in survey panel, is comprised of 1.5 million U.S. residents who have agreed to participate in YouGov Web surveys. At any given time, YouGov maintains a minimum of five recruitment campaigns based on salient current events.

Panel members are recruited by a number of methods and on a variety of topics to help ensure diversity in the panel population. Recruiting methods include Web advertising campaigns (public surveys), permission-based email campaigns, partner sponsored solicitations, telephone-to-Web recruitment (RDD based sampling), and mail-to-Web recruitment (Voter Registration Based Sampling).

The primary method of recruitment for the YouGov Panel is Web advertising campaigns that appear based on keyword searches. In practice, a search in Google may prompt an active YouGov advertisement soliciting opinion on the search topic. At the conclusion of the short survey respondents are invited to join the YouGov panel in order to receive and participate in additional surveys. After a double opt-in procedure, where respondents must confirm their consent by responding to an email, the database checks to ensure the newly recruited panelist is in fact new and that the address information provided is valid.

University of Texas / Texas Politics Project Poll
June 2024 Texas Statewide Survey Crosstabs

The YouGov panel currently has over 20,000 active panelists who are residents of Texas. These panelists cover a wide range of demographic characteristics.

Sampling and Sample Matching

Sample matching is a methodology for selection of “representative” samples from non-randomly selected pools of respondents. It is ideally suited for Web access panels, but could also be used for other types of surveys, such as phone surveys. Sample matching starts with an enumeration of the target population. For general population studies, the target population is all adults, and can be enumerated through the use of the decennial Census or a high-quality survey, such as the American Community Survey. In other contexts, this is known as the sampling frame, though, unlike conventional sampling, the sample is not drawn from the frame. Traditional sampling, then, selects individuals from the sampling frame at random for participation in the study. This may not be feasible or economical as the contact information, especially email addresses, is not available for all individuals in the frame and refusals to participate increase the costs of sampling in this way.

Sample selection using the matching methodology is a two-stage process. First, a random sample is drawn from the target population. We call this sample the target sample. Details on how the target sample is drawn are provided below, but the essential idea is that this sample is a true probability sample and thus representative of the frame from which it was drawn.

Second, for each member of the target sample, we select one or more matching members from our pool of opt-in respondents. This is called the matched sample. Matching is accomplished using a large set of variables that are available in consumer and voter databases for both the target population and the opt-in panel.

The purpose of matching is to find an available respondent who is as similar as possible to the selected member of the target sample. The result is a sample of respondents who have the same measured characteristics as the target sample. Under certain conditions, described below, the matched sample will have similar properties to a true random sample. That is, the matched sample mimics the characteristics of the target sample.

When choosing the matched sample, it is necessary to find the closest matching respondent in the panel of opt-ins to each member of the target sample. YouGov employs the proximity matching method to find the closest matching respondent. For each variable used for matching, we define a distance function, $d(x,y)$, which describes how “close” the values x and y are on a particular attribute. The overall distance between a member of the target sample and a member of the panel is a weighted sum of the individual distance functions on each attribute. The weights can be adjusted for each study based upon which variables are thought to be important for that study, though, for the most part, we have not found the matching procedure to be sensitive to small adjustments of the weights. A large weight, on the other hand, forces the algorithm toward an exact match on that dimension.

Interest and Engagement

Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?
