Methodology.....	8
Interest and Engagement.....	10
Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?.....	10
Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?.....	12
Most Important Problem.....	14
Q4. What would you say is the most important problem facing this country today?.....	14
Q5. What would you say is the most important problem facing the State of Texas today?.....	17
Retrospective Assessments.....	20
Q6. How would you rate the job Donald Trump is doing as president? Would you say that you.....	20
Q7. How would you rate the job the U.S. Congress is doing? Would you say that you.....	22
Q7A. How would you rate the job the U.S. Supreme Court is doing? Would you say that you.....	24
Q8A. How would you rate the job Greg Abbott is doing as Governor? Would you say that you.....	26
Q8B. How would you rate the job Dan Patrick is doing as Lieutenant Governor? Would you say that you.....	28
Q8C. How would you rate the job Dustin Burrows is doing as Speaker of the Texas House of Representatives? Would you say that you.....	30
Q8C2. How would you rate the job the Texas Legislature is doing? Would you say that you.....	32
Q8D. How would you rate the job Ken Paxton is doing as Attorney General? Would you say that you.....	34
Q9A. How would you rate the job Ted Cruz is doing as U.S. Senator? Would you say that you.....	36
Q9B. How would you rate the job John Cornyn is doing as U.S. Senator? Would you say that you.....	38
Q10. Thinking about the country, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?.....	40
Q11. Compared to a year ago, would you say that the national economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	42
Q12. Thinking about the State of Texas, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?.....	44
Q14. Compared to a year ago, would you say that the Texas economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	46
Q13. Compared to a year ago, would you say that you and your family are economically a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	48
Q15. A year from now, do you expect that the national economy will be a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?.....	50
Q16A. How concerned, if at all, are you personally about each of the following economic issues in the country today? The price of food and consumer goods.....	52

Q37. How concerned are you about anti-semitism in Texas?.....	279

Methodology

Sampling and Weighting Methodology for the June 2025 Texas Statewide Study

For the survey, YouGov interviewed 1331 Texas registered voters between June 6-16th, 2025 who were then matched down to a sample of 1,200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education.¹ The frame was constructed by using different subsets of a politically representative "modelled frame" of US adults, based upon the American Community Survey (ACS) public use microdata file, public voter file records, the 2020 Current Population Survey (CPS) Voting and Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the 2020 CES surveys, including demographics and 2024 presidential vote.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. The weights were then post-stratified on 2024 Presidential vote choice, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

The margin of error is +/-2.83 percentage points among registered voters, and +/- 3.47% percentage points accounting for the weighted data.

Survey Panel Data

The YouGov panel, a proprietary opt-in survey panel, is comprised of 1.5 million U.S. residents who have agreed to participate in YouGov Web surveys. At any given time, YouGov maintains a minimum of five recruitment campaigns based on salient current events.

Panel members are recruited by a number of methods and on a variety of topics to help ensure diversity in the panel population. Recruiting methods include Web advertising campaigns (public surveys), permission-based email campaigns, partner sponsored solicitations, telephone-to-Web recruitment (RDD based sampling), and mail-to-Web recruitment (Voter Registration Based Sampling).

The primary method of recruitment for the YouGov Panel is Web advertising campaigns that appear based on keyword searches. In practice, a search in Google may prompt an active YouGov advertisement soliciting opinion on the search topic. At the conclusion of the short survey respondents are invited to join the YouGov panel in order to receive and participate in additional surveys. After a double opt-in procedure, where respondents must confirm their consent by responding to an email, the database checks to ensure the newly recruited panellist is in fact new and that the address information provided is valid.

University of Texas / Texas Politics Project Poll
June 2025 Texas Statewide Survey Crosstabs

The YouGov panel currently has over 20,000 active panelists who are residents of Texas. These panelists cover a wide range of demographic characteristics.

Sampling and Sample Matching

Sample matching is a methodology for selection of “representative” samples from non-randomly selected pools of respondents. It is ideally suited for Web access panels, but could also be used for other types of surveys, such as phone surveys. Sample matching starts with an enumeration of the target population. For general population studies, the target population is all adults, and can be enumerated through the use of the decennial Census or a high-quality survey, such as the American Community Survey. In other contexts, this is known as the sampling frame, though, unlike conventional sampling, the sample is not drawn from the frame. Traditional sampling, then, selects individuals from the sampling frame at random for participation in the study. This may not be feasible or economical as the contact information, especially email addresses, is not available for all individuals in the frame and refusals to participate increase the costs of sampling in this way.

Sample selection using the matching methodology is a two-stage process. First, a random sample is drawn from the target population. We call this sample the target sample. Details on how the target sample is drawn are provided below, but the essential idea is that this sample is a true probability sample and thus representative of the frame from which it was drawn.

Second, for each member of the target sample, we select one or more matching members from our pool of opt-in respondents. This is called the matched sample. Matching is accomplished using a large set of variables that are available in consumer and voter databases for both the target population and the opt-in panel.

The purpose of matching is to find an available respondent who is as similar as possible to the selected member of the target sample. The result is a sample of respondents who have the same measured characteristics as the target sample. Under certain conditions, described below, the matched sample will have similar properties to a true random sample. That is, the matched sample mimics the characteristics of the target sample.

When choosing the matched sample, it is necessary to find the closest matching respondent in the panel of opt-ins to each member of the target sample. YouGov employs the proximity matching method to find the closest matching respondent. For each variable used for matching, we define a distance function, $d(x,y)$, which describes how “close” the values x and y are on a particular attribute. The overall distance between a member of the target sample and a member of the panel is a weighted sum of the individual distance functions on each attribute. The weights can be adjusted for each study based upon which variables are thought to be important for that study, though, for the most part, we have not found the matching procedure to be sensitive to small adjustments of the weights. A large weight, on the other hand, forces the algorithm toward an exact match on that dimension.

Interest and Engagement

Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?

	Extremely interested	Somewhat interested	Not very interested	Not at all interested	Don't know

University of Texas / Texas Politics Project Poll
June 2025 Texas Statewide Survey Crosstabs

Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?

	Every election	Almost every election	About half	One or two	None	Don't know
