Project Code: UTEX0066e
Project Name: Texas Tribune October
Prepared for: Joshua Blank
Interviews: 1200
Field Period: October 10, 2025 – October 20, 2025
Project Manager: Sara Sermarini, sara.sermarini@yougov.com

=====

YouGov interviewed 1594 respondents who were then matched down to a sample of 1200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The sampling frame was constructed based upon the American Community Survey (ACS) public use microdata file.

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and home ownership. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2024 presidential vote choice as well as a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

=====

Variable List

=====

caseid	Case ID
weight	Weight
Q1	Registered to vote
Q2	Interest in politics and public affairs
Q3	Election voting history
Q4	Most important problem in this country today
