================================================================================
Project Code: UTEX0038b
Project Name: Texas Tribune April 2020
Prepared for: University of Texas
Interviews: 1200
Field Period: April 10, 2020 - April 17, 2020
Project Manager: Sam Luks - 650.462.8009
================================================================================
```

YouGov interviewed 1497 respondents who were then matched down to a
sample of 1200 to produce the final dataset. The respondents were
matched to a sampling frame on gender, age, race, and education. The
frame was constructed by stratified sampling from the full 2017 American
Community Survey (ACS) 1-year sample with selection within strata by weighted
sampling with replacements (using the person weights on the public use
file).
The matched cases were weighted to the sampling frame using propensity
scores. The matched cases and the frame were combined and a logistic
regression was estimated for inclusion in the frame. The propensity
score function included age, gender, race/ethnicity, years of education,
and region. The propensity scores were grouped into deciles of the
estimated propensity score in the frame and post-stratified according to
these deciles.
The weights were then post-stratified on 2016 Presidential vote choice, and
a four-way stratification of gender, age (4-categories), race (4-
categories), and education (4-categories), to produce the final weight.
