Interest and Engagement

Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?

Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?

Most Important Problem

Q4. What would you say is the most important problem facing this country today?

Q5. What would you say is the most important problem facing the State of Texas today?

Retrospective Assessments

Q6. How would you rate the job Joe Biden is doing as president? Would you say that you...

Q6A. Do you approve or disapprove of how Joe Biden has handled the response to the coronavirus/COVID-19?

Q7. How would you rate the job the U.S. Congress is doing? Would you say that you...

Q8A. How would you rate the job Greg Abbott is doing as Governor? Would you say that you...

Q8A2. Do you approve or disapprove of how Greg Abbott has handled the response to the coronavirus/COVID-19?

Q8B. How would you rate the job Dan Patrick is doing as Lieutenant Governor? Would you say that you...

Q8C. How would you rate the job Dade Phelan is doing as Speaker of the Texas House of Representatives? Would you say that you...

Q9A. How would you rate the job Ted Cruz is doing as U.S. Senator? Would you say that you...

Q9B. How would you rate the job John Cornyn is doing as U.S. Senator? Would you say that you...

Q10. Thinking about the country, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?

Q11. Compared to a year ago, would you say that the national economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q12. Thinking about the State of Texas, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?

Q13. Compared to a year ago, would you say that you and your family are economically a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q14. Compared to a year ago, would you say that the Texas economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q15. Is Texas's increasing racial and ethnic diversity a cause for optimism or a cause for concern?

Q16. Of the three branches of the federal government, which one do you trust the most?

Political Figures and Elections

Q17. Please tell us whether you have a very favorable, somewhat favorable, neither favorable nor unfavorable, somewhat unfavorable, or very unfavorable opinion of Donald Trump.

Q17B. Based on what you know, do you think that Donald Trump took actions while president that justify preventing him from holding future elected office?

Q18A. Overall, how accurate do you think official election results are in the U.S.?

Q18B. Overall, how accurate do you think official election results are in Texas?

Q19. As you probably know, the Texas Legislature is currently meeting in Austin for the 140-day legislative session held every other year. What do you think should be the legislature's top priority?

Q20. Every ten years states redraw the boundaries of congressional and legislative districts based on new Census figures in a process called redistricting. How much have you heard about the 2021 redistricting process in Texas?

Q21A A. In your opinion, how important is it for each of the following to receive help from Texas state government to recover from the negative effects of the coronavirus pandemic? *Large businesses/employers*

Q21A B. In your opinion, how important is it for each of the following to receive help from Texas state government to recover from the negative effects of the coronavirus pandemic? *Small businesses/employers*

Q21A C. In your opinion, how important is it for each of the following to receive help from Texas state government to recover from the negative effects of the coronavirus pandemic? *Individuals & families*

media

Q38E. Do you approve or disapprove of how each of the following is handling the coronavirus/COVID-19? *Health care professionals*

Q39. How concerned are you about the spread of the coronavirus in your community?

Q40. How concerned are you about you or someone you know getting infected with the coronavirus?

Q41. Overall, how would you say efforts to distribute the coronavirus/COVID-19 vaccine are going where you live?

Q42A. Are you going to try to get a COVID vaccine as soon as it becomes available to you?

Q42B. [ASK IF Q42A !=4] And to the best of your knowledge, are you currently eligible to receive a COVID vaccine?

Q43. As you may know, many Americans have been told to stay home if they can because of the coronavirus pandemic. Which of these best describes you these days?

Q44A. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? *Staying away from large groups*

Q44B. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? *Avoiding other people as much as possible*

Q44C. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? *Wearing a mask when in close contact with people outside your household*

Q45A. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go to work*

Q45B. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Fly on an airplane*

Q45C. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Eat at a restaurant*

Q45D. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Attend a sporting event or concert at an outdoor stadium*

Q45E. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Attend a sporting event or concert in an indoor arena*

Q45F. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go to a movie theater*

Q45G. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Attend church*

Q45H. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Send your child to school*

Q45I. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go grocery shopping*

Q45J. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go to a bar or club*

Q45K. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go to a gym or health club*

Q45L. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Stay in a hotel*

Q45M. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Go to a shopping mall*

Q45N. Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to.. *Get a haircut*

Sampling and Weighting Methodology for the February 2021 Texas Statewide Study

For the survey, YouGov interviewed 1535 Texas registered voters between February 12 and February 18, 2021, who were then matched down to a sample of 1200 to produce the final dataset. The respondents were matched on gender, age, race, and education. YouGov then weighted the matched set of survey respondents to known characteristics of registered voters of Texas from the 2018 Current Population survey and 2014 Pew Religious Landscape Survey.

The respondents were matched to a sampling frame on gender, age, race, and education. The frame was constructed by stratified sampling from the full 2018 Current Population Survey (CPS) voter registration supplement with selection within strata by weighted sampling with replacements (using the person weights on the public use file). For the main sample, the matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. These weights were then post-stratified on baseline party identification, the 2020 and 2016 presidential vote, ideology, and a full stratification of four-category age, four-category race, gender, and four-category education. The weights were trimmed at 7 and normalized to sum to the sample size.

The margin of error of the weighted data for registered voters is 2.8% for registered voters (if adjusted for weighting, the margin of error for registered voters is 3.5%).

Survey Panel Data

The YouGov panel, a proprietary opt-in survey panel, is comprised of 1.5 million U.S. residents who have agreed to participate in YouGov Web surveys. At any given time, YouGov maintains a minimum of five recruitment campaigns based on salient current events.

Panel members are recruited by a number of methods and on a variety of topics to help ensure diversity in the panel population. Recruiting methods include Web advertising campaigns (public surveys), permission-based email campaigns, partner sponsored solicitations, telephone-to-Web recruitment (RDD based sampling), and mail-to-Web recruitment (Voter Registration Based Sampling).

The primary method of recruitment for the YouGov Panel is Web advertising campaigns that appear based on keyword searches. In practice, a search in Google may prompt an active YouGov advertisement soliciting opinion on the search topic. At the conclusion of the short survey respondents are invited to join the YouGov panel in order to receive and participate in additional surveys. After a double opt-in procedure, where respondents must confirm their consent by responding to an email, the database checks to ensure the newly recruited panelist is in fact new and that the address information provided is valid.

The YouGov panel currently has over 20,000 active panelists who are residents of Texas. These panelists cover a wide range of demographic characteristics.

Sampling and Sample Matching

Sample matching is a methodology for selection of “representative” samples from non-randomly selected pools of respondents. It is ideally suited for Web access panels, but could also be used for other types of surveys, such as phone surveys. Sample matching starts with an enumeration of the target population. For general population studies, the target population is all adults, and can be enumerated through the use of the decennial Census or a high-quality survey, such as the American Community Survey. In other contexts, this is known as the sampling frame, though, unlike conventional sampling, the sample is not drawn from the frame. Traditional sampling, then, selects individuals from the sampling frame at random for participation in the study. This may not be feasible or economical as the contact information, especially email addresses, is not available for all individuals in the frame and refusals to participate increase the costs of sampling in this way.

Sample selection using the matching methodology is a two-stage process. First, a random sample is drawn from the target population. We call this sample the target sample. Details on how the target sample is drawn are provided below, but the essential idea is that this sample is a true probability sample and thus representative of the frame from which it was drawn.

Second, for each member of the target sample, we select one or more matching members from our pool of opt-in respondents. This is called the matched sample. Matching is accomplished using a large set of variables that are available in consumer and voter databases for both the target population and the opt-in panel.

The purpose of matching is to find an available respondent who is as similar as possible to the selected member of the target sample. The result is a sample of respondents who have the same measured characteristics as the target sample. Under certain conditions, described below, the matched sample will have similar properties to a true random sample. That is, the matched sample mimics the characteristics of the target sample.

When choosing the matched sample, it is necessary to find the closest matching respondent in the panel of opt-ins to each member of the target sample. YouGov employs the proximity matching method to find the closest matching respondent. For each variable used for matching, we define a distance function, $d(x,y)$, which describes how “close” the values x and y are on a particular attribute. The overall distance between a member of the target sample and a member of the panel is a weighted sum of the individual distance functions on each attribute. The weights can be adjusted for each study based upon which variables are thought to be important for that study, though, for the most part, we have not found the matching procedure to be sensitive to small adjustments of the weights. A large weight, on the other hand, forces the algorithm toward an exact match on that dimension.
