## Table of Contents

### Interest and Engagement

Q2. Generally speaking, would you say that you are extremely interested in politics and public affairs, somewhat interested, not very interested, or not at all interested?

Q3. There are many elections in the state of Texas. Furthermore, many people intend to vote in a given election, but sometimes personal and professional circumstances keep them from the polls. Thinking back over the past two or three years, would you say that you voted in all elections, almost all, about half, one or two, or none at all?

Q3A. If the 2022 primary elections were held today, would you vote in the Republican primary, the Democratic primary, or wouldn't you vote in either primary?

Q3B. On a 0-10 scale, please rate how likely you are to vote in the 2022 primary elections: 10 means you are absolutely certain to vote, 0 means you will definitely NOT vote, and 5 means you may or may not vote.

### Most Important Problem

Q4. What would you say is the most important problem facing this country today? [Randomize]

Q5. What would you say is the most important problem facing the State of Texas today? [Randomize]

### Retrospective Assessments

Q6. How would you rate the job Joe Biden is doing as president? Would you say that you...

Q6A. Do you approve or disapprove of how Joe Biden has handled the response to the coronavirus/COVID-19?

Q7. How would you rate the job the U.S. Congress is doing? Would you say that you...

Q8A. How would you rate the job Greg Abbott is doing as Governor? Would you say that you...

Q8A2. Do you approve or disapprove of how Greg Abbott has handled the response to the coronavirus/COVID-19?

Q8B. How would you rate the job Dan Patrick is doing as Lieutenant Governor? Would you say that you...

Q8C. How would you rate the job Dade Phelan is doing as Speaker of the Texas House of Representatives? Would you say that you...

Q8C2. How would you rate the job the Texas Legislature is doing? Would you say that you...

Q8D. How would you rate the job Ken Paxton is doing as Attorney General? Would you say that you...

Q9A. How would you rate the job Ted Cruz is doing as U.S. Senator? Would you say that you...

Q9B. How would you rate the job John Cornyn is doing as U.S. Senator? Would you say that you...

Q10. Thinking about the country, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?

Q11. Compared to a year ago, would you say that the national economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q12. Thinking about the State of Texas, do you think that things are headed in the right direction, or do you think that things are headed off on the wrong track?

Q13. Compared to a year ago, would you say that you and your family are economically a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q14. Compared to a year ago, would you say that the Texas economy is a lot better off, somewhat better off, about the same, somewhat worse off, or a lot worse off?

Q15. Is Texas's increasing racial and ethnic diversity a cause for optimism or a cause for concern?

Q16A. Overall, how accurate do you think official election results are in the U.S.?

Q16B. Overall, how accurate do you think official election results are in Texas?

Q17A. How well is democracy working in the U.S. today?

Q17B. How well is democracy working in Texas today?

### Political Figures and Elections

Q18. How much have you heard about the current special session of the Texas Legislature?

Q19A. How much have you thought about who you will be supporting for each of the following offices in the 2022

# University of Texas / Texas Politics Project Poll Crosstabs

Texas elections? Governor

Q19B. How much have you thought about who you will be supporting for each of the following offices in the 2022 Texas elections? Lieutenant Governor

Q19C. How much have you thought about who you will be supporting for each of the following offices in the 2022 Texas elections? Attorney General

Q19D. How much have you thought about who you will be supporting for each of the following offices in the 2022 Texas elections? Your Representative in the U.S. Congress

Q19E. How much have you thought about who you will be supporting for each of the following offices in the 2022 Texas elections? Your State Representative in the Texas Legislature

Q19F. How much have you thought about who you will be supporting for each of the following offices in the 2022 Texas elections? Your State Senator in the Texas Legislature

Q20A. Please tell us whether you have a very favorable, somewhat favorable, neither favorable nor unfavorable, somewhat unfavorable, or very unfavorable opinion of the Republican Party.

Q20B. Please tell us whether you have a very favorable, somewhat favorable, neither favorable nor unfavorable, somewhat unfavorable, or very unfavorable opinion of the Democratic Party.

Q21F. Do you approve or disapprove of the decision to remove U.S. military forces from Afghanistan?

Q21A. Do you approve or disapprove of how Joe Biden has handled the economy?

Q21B. Do you approve or disapprove of how Joe Biden has handled immigration and border security?

Q21C. Do you approve or disapprove of how Joe Biden has handled transportation and infrastructure?

Q21D. Do you approve or disapprove of how Greg Abbott has handled immigration and border security?

Q21E. Do you approve or disapprove of how Greg Abbott has handled immigration and border security?

## The Coronavirus Pandemic/COVID-19

Q22A. In general, do you think that vaccines are...Safe?

Q22B. In general, do you think that vaccines are...Effective?

Q23. Would you say that the coronavirus/COVID-19 is...

Q24A. Do you approve or disapprove of how each of the following is handling the coronavirus/COVID-19? The Federal Government.

Q24B. Do you approve or disapprove of how each of the following is handling the coronavirus/COVID-19? State Government

Q24C. Do you approve or disapprove of how each of the following is handling the coronavirus/COVID-19? Local Government

Q25. How concerned are you about the spread of the coronavirus in your community?

Q26. How concerned are you about you or someone you know getting infected with the coronavirus?

Q27. Do you plan on getting a COVID vaccination? [RANDOMIZE 2-3]

Q28. Thinking about how you and your family are dealing with the coronavirus pandemic, which of these best describes you these days?

Q29 A. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? Staying away from large groups.

Q29 B. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? Avoiding other people as much as possible.

Q29 C. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? Wearing a mask when in close contact with people outside your household.

Q29 D. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? Wearing a mask in indoor public places.

Q29 E. Which of the following measures, if any, are you taking in response to the coronavirus/COVID-19? Wearing a mask in outdoor public places.

Q30. Do you support or oppose the use of a credential (e.g. a "vaccine passport") for people to provide evidence that they have been vaccinated against COVID-19 in order to gain admission to events or activities with large groups of people?

Q31 A Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to...Go to work?

Q31 B Regardless of the current restrictions in your local area, do you think it would be safe or unsafe for you to...Fly on an airplane?

[Q43. Do you think that Texas spends too much, too little, or about the right amount on border security?](#)

[Q44. Every ten years states redraw the boundaries of congressional and legislative districts based on new Census figures in a process called redistricting. How much have you heard about the 2021 redistricting process in Texas?](#)

## Sampling and Weighting Methodology for the August 2021 Texas Statewide Study

For the survey, YouGov interviewed 1536 Texas registered voters between August 20 and August 30, 2021, who were then matched down to a sample of 1200 to produce the final dataset. The respondents were matched on gender, age, race, and education. YouGov then weighted the matched set of survey respondents to known characteristics of registered voters of Texas from the 2018 Current Population survey and 2014 Pew Religious Landscape Survey.

The respondents were matched to a sampling frame on gender, age, race, and education. The frame was constructed by stratified sampling from the full 2018 Current Population Survey (CPS) voter registration supplement with selection within strata by weighted sampling with replacements (using the person weights on the public use file). For the main sample, the matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, and years of education. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles. These weights were then post-stratified on baseline party identification, the 2020 and 2016 presidential vote, ideology, and a full stratification of four-category age, four-category race, gender, and four-category education. The weights were trimmed at 7 and normalized to sum to the sample size.

The margin of error of the weighted data for registered voters is 2.8% for registered voters (if adjusted for weighting, the margin of error for registered voters is 3.4%).

## Survey Panel Data

The YouGov panel, a proprietary opt-in survey panel, is comprised of 1.5 million U.S. residents who have agreed to participate in YouGov Web surveys. At any given time, YouGov maintains a minimum of five recruitment campaigns based on salient current events.

Panel members are recruited by a number of methods and on a variety of topics to help ensure diversity in the panel population. Recruiting methods include Web advertising campaigns (public surveys), permission-based email campaigns, partner sponsored solicitations, telephone-to-Web recruitment (RDD based sampling), and mail-to-Web recruitment (Voter Registration Based Sampling).

The primary method of recruitment for the YouGov Panel is Web advertising campaigns that appear based on keyword searches. In practice, a search in Google may prompt an active YouGov advertisement soliciting opinion on the search topic. At the conclusion of the short survey respondents are invited to join the YouGov panel in order to receive and participate in additional surveys. After a double opt-in procedure, where respondents must confirm their consent by responding to an email, the database checks to ensure the newly recruited panelist is in fact new and that the address information provided is valid.

The YouGov panel currently has over 20,000 active panelists who are residents of Texas. These panelists cover a wide range of demographic characteristics.

## Sampling and Sample Matching

Sample matching is a methodology for selection of “representative” samples from non-randomly selected pools of respondents. It is ideally suited for Web access panels, but could also be used for other types of surveys, such as phone surveys. Sample matching starts with an enumeration of the target population. For general population studies, the target population is all adults, and can be enumerated through the use of the decennial Census or a high-quality survey, such as the American Community Survey. In other contexts, this is known as the sampling frame, though, unlike conventional sampling, the sample is not drawn from the frame. Traditional sampling, then, selects individuals from the sampling frame at random for participation in the study. This may not be feasible or economical as the contact information, especially email addresses, is not available for all individuals in the frame and refusals to participate increase the costs of sampling in this way.

Sample selection using the matching methodology is a two-stage process. First, a random sample is drawn from the target population. We call this sample the target sample. Details on how the target sample is drawn are provided below, but the essential idea is that this sample is a true probability sample and thus representative of the frame from which it was drawn.

Second, for each member of the target sample, we select one or more matching members from our pool of opt-in respondents. This is called the matched sample. Matching is accomplished using a large set of variables that are available in consumer and voter databases for both the target population and the opt-in panel.

The purpose of matching is to find an available respondent who is as similar as possible to the selected member of the target sample. The result is a sample of respondents who have the same measured characteristics as the target sample. Under certain conditions, described below, the matched sample will have similar properties to a true random sample. That is, the matched sample mimics the characteristics of the target sample.

When choosing the matched sample, it is necessary to find the closest matching respondent in the panel of opt-ins to each member of the target sample. YouGov employs the proximity matching method to find the closest matching respondent. For each variable used for matching, we define a distance function,  $d(x,y)$ , which describes how “close” the values  $x$  and  $y$  are on a particular attribute. The overall distance between a member of the target sample and a member of the panel is a weighted sum of the individual distance functions on each attribute. The weights can be adjusted for each study based upon which variables are thought to be important for that study, though, for the most part, we have not found the matching procedure to be sensitive to small adjustments of the weights. A large weight, on the other hand, forces the algorithm toward an exact match on that dimension.
