

=====  
Project Code: UTEX0024c  
Project Name: Texas Tribune 2015, Survey 3  
Prepared for: Jim Henson  
Interviews: 1200  
Field Period: October 30, 2015 to November 8, 2015  
Project Manager: Sam Luks - 650.462.8009  
=====

YouGov interviewed 1484 respondents who were then matched down to a sample of 1200 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, education, party identification, ideology, and political interest. The frame was constructed by stratified sampling from the full 2012 American Community Survey (ACS) sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file). Data on voter registration status and turnout were matched to this frame using the November 2012 Current Population Survey. Data on interest in politics and party identification were then matched to this frame from the 2007 Pew Religious Life Survey.

The matched cases were weighted to a sampling frame of Texas registered voters using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and ideology. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

#### Variable List

=====  
Name                      Description  
-----                      -  
caseid                      Case ID  
weight                      Case weight
